

Dear colleagues
within the:

**3rd International Congress on Green Process Engineering, GPE 2011,
Kuala Lumpur, Malaysia,
6-8 December 2011**

an important space will be given to **Sustainable and clean technologies**, and specially to **Microwave assisted processes**. Microwave and RF technologies have been worldwide recognized as the most efficient techniques to deliver energy to a chemical reactor and the contribution to basic understanding and scale-up is fundamental for developing safe and modern processes.

This event is expected to bring together more than 400 local and international scientists and experts from universities, industries, government agencies and businesses that are involved in sustainable green process technologies.

Registration and abstract submission are activated. We remind you that the deadline for abstract submission is 12 January 2011. Please note that only online submissions will be considered. You can upload your abstract by following the instructions given on the congress website. We will be soliciting ISI ranked journals to publish selected articles presented at the congress.

Further information about the congress and the first announcement are now available on the congress website: <<http://www.gpe2011.com/>>.

If you need any further information, please don't hesitate to contact the Secretariat at:
