

### **Submit your Microwave Heating and Processing abstracts**

The IET RF and Microwave Network in conjunction with the National Centre for Industrial Microwave Processing (NCIMP) at the University of Nottingham will be hosting a one-day seminar reviewing the latest developments in industrial microwave processing and technology on 2 December 2010.

The day will consist of short presentations and poster sessions and will provide an opportunity for PhD and Masters students to present their work and discuss ideas in an informal setting.

We are inviting abstracts from areas relating to microwave heating and processing including but not limited to:

- Dielectric property measurement and non-destructive testing
- Microwave processing in all application areas including chemistry, food, bio-processing, mineral processing, oil and gas, waste treatment, materials, etc.
- High temperature processing using microwaves and radio frequency
- Microwave / RF applicator and system design

Please submit your abstracts to  
[ncimp@nottingham.ac.uk](mailto:ncimp@nottingham.ac.uk)  
by the deadline, **15 October 2010**.

The conference will bring together this student community to foster new collaborations, encourage multi-disciplinary interactions and showcase the current state of the art and future opportunities in Microwave Heating and Processing.

We look forward to receiving your abstracts.

Kind regards,  
Maninder Paul  
IET Community Development Manager
