

Dear Colleagues,

We would like to remind you that the deadline for early bird registration 7th June is rapidly approaching.

This year's AMPERE 2019 Technical Program includes three days of more than 190 oral presentations, posters, plenary and keynote talks, industrial exhibits and student competition with one additional day of workshops.

The AMPERE 2019 Conference will feature an exceptional speaking lineup including topics as energy production by microwaves, plasma, chemistry, additive manufacturing, modeling, measurements, etc. Industrial sessions (Wednesday, September 11th), addressing key topical applications, will also be of significant interest during the conference.

Short-Course & Modelling Workshop one-day events will be held on Monday, (September 9, 2019). Both courses are designed to increase the knowledge in the microwave science while offering the experience of highly regarded experts.

Ampere 2019 Social Program will provide attendees with many networking opportunities over the course of the three-day event. The city of Valencia has many attractions making it one of the best locations for congresses, tourists and trade in Europe.

We kindly ask you to register before 7th June to profit from the early bird discount, and to help us organising a wonderful conference.

Kind regards,

Prof. José M. Catalá Civera and Prof. Felipe Penaranda-Foix
